Dear Tom,

With developments in the North/West of Canberra reaching into Yass Valley and Developments in the east of Canberra connecting into Queanbeyan I would be interested in the electoral commission having boundaries that include both Canberra and region. Cross border issues are significant for territory and state, having a federal member with responsibility in both areas would provide some political imperative alongside the social and business imperative that is already there. This may go some way to having a person helping to solve what is now and will be even more so in the future a significant issue for Canberra and Region growth. Not sure if this is possible but thought I would put it out there.

Thanks

Simon
