Subject: Victoria redistribution submission
Attachments: redistribution changes.xlsx

Importance: High

Hi,

Thank you for the opportunity to make a submission in relation to the redrawing of the electoral boundaries for Victoria.

My submission primarily relates to the areas which should be contained within the various divisions but also provides a suggestion re a possible name for the 38th division which needs to be created in Victoria.

I have primarily looked at the electorates to the North and West of Melbourne based on the two parameters as outlined being the 10% variation from the actual enrolment of 4/9/2017 and the 3.5% variance from the projected enrolment at 25/8/19. I have looked at things from the perspective of how can the transfer of electors between divisions be minimalised given this was an approach taken in the 2010 redistribution.

From this I have formed the view that the new 38th electorate is best formed primarily by incorporating the Melton / Rural component of the Gorton electorate with the region surrounding Sunbury (extending to Gisborne and Romsey) from the McEwan electorate. Melton and Sunbury are both broadly an equivalent distance from the Melbourne CBD and share the similar characteristic in that there is a significant undeveloped area between them and what would be categorised as metropolitan Melbourne. Additionally both are characterised as developing areas and thus share similar population characteristics.

In looking at a name for the division I was drawn to the fact that for the period between 1969 and 2004 both Sunbury and Gisborne were in the division of Burke and that the division of Burke was abolished to facilitate the creation of the division of Gorton (of which Melton in a large part). Consequently, for simplicity I am suggesting a return of this electorate name for this area.

In terms of redividing the electorates I formed the view that the best starting point was with the division of Lalor and working from there. I did this on account that there were limited possibilities in relation to where the electors in that division could be redistributed to.

The only possibility was to move the Lalor electors to Gellibrand. This was done by moving the electors broadly North of Snydes Rd in Point Cook to the division of Gellibrand. In doing so areas such as Altona Meadows and Seabrook which had previously been in Gellibrand returned to that division.

The surplus electors in Gellibrand primarily moved to the division of Gorton with a small number moving to the electorate of Maribyrnong. Primarily those moved to Maribyrnong were moved to provide a more "hard" edge to the division than was previously the case. Voters transferred to Gorton came from the Western side of the Gellibrand electorate and included the areas of Braybrook, Ardeer, Sunshine and Sunshine West. I request a "hard edge" as having worked as the OIC in the prepoll for the 2016 election within the division of Gellibrand the existing boundary between Gellibrand and Maribyrnong created difficulty in easily ascertaining which electorate the voter was from. Anything that could be done to remediate that situation, such as using a major road or a postcode, would be a welcome improvement and would certainly assist in providing a better voter experience.

Having picked up electors from Gellibrand the division of Gorton needed to lose electors and as was mentioned above this was done by moving electors broadly west of a North / South line associated with the western extremity of Caroline Springs to the new electorate of Burke. Gorton was now under represented however moving the

Braybrook and Sunshine West areas from Maribyrnong to Gorton restored the balance. These areas both have a common association with other areas moved from Gellibrand to Gorton.

Having moved a small component of Gellibrand to Maribyrnong by moving the part of Ascot Vale West of Epsom Rd from the division of Melbourne restored an adequate number of voters to Maribyrnong.

Turning to the Division of Melbourne in addition to moving the part of Ascot Vale which is West of Epsom Rd to Maribyrnong by moving Abbotsford to the division of Batman this division falls within acceptable bounds.

Having received the Abbotsford area from Melbourne Batman now needed to lose voters. By moving the Thomastown and Bundoora West areas to Scullin this division falls within acceptable bounds. There is merit in moving these two areas on account that they are currently split between the divisions of Scullin and Batman.

Scullin was brought within acceptable bounds by relocating the SA1 areas 2121801 and 2121852 to the division of McEwan. These SA1's relate to the Woolert area with most of that area being already in McEwan. This facilitates the joining of areas of interest.

Additional moves include moving the area SA2's as follows;

- Fawkner from Wills to Calwell,
- Sydenham from Calwell to Burke,
- Golden Plains North and Golden Plains South from Corangamite to Wannon.

These then allow the sending and receiving divisions to fall within acceptable bounds.

I wasn't able to form a view of how the Flinders division could be formed without making major alterations particularly to the division of Dunkley, a division whose population is currently within acceptable bounds as is those for the majority of the divisions to the north of it. I also noted that when divided by 4 the combined population of the divisions of Holt, Bruce, Aston and McMillan falls within acceptable bounds consequently a full analysis of SA1 and SA2 areas should facilitate a solution. In saying that the area of McMillan needing to be excised will be from the suburban Western end of the division as the adjoining division to the East (Gippsland).

I feel it would be also good to further evaluate if any of the division of Bendigo could be moved to the division of Mallee. Whilst Mallee is within acceptable bounds it would be better to receive additional population to make its population comparable with other divisions.

In the 2010 redistribution I did suggest that consideration be given to redesigning the electorates of Hotham and Goldstein such that both electorates became more marginal. I believe marginal electorates provide for better political representation than in electorates classified as "Blue Ribbon" which is what these are currently. I would ask that this be given consideration. There may be other divisions that this could also be applied to.

I attach for your use details of the SA1 changes related to the above.

I look forward to examining your outcomes in April 2018

Colin McLaren
