The Electoral Redistribution Committee for Victoria

Dear Commissioners,

I would like to present a submission relating to the redistributed boundaries for the Victorian divisions of Fraser, Gellibrand, and Lalor.

The main aims of my submission are to unify the entirety of the suburb of Yarraville within the Division of Fraser and to unify the entirety of the suburb of Point Cook within the Division of Gellibrand.

As it currently stands small proportions of these suburbs are split off from the remainder into an adjacent division. I believe it would be ideal if this could be rectified as these sections are currently removed from their communities of interest.

To achieve this, I would suggest making the following changes to the borders of the Gellibrand Division.

The remaining pockets of Yarraville currently in the Division of Gellibrand (SA2 Yarraville 213031352, SA1's 10,11,12,17,18,19,20,21,22,23,24,25,26,30,32,33 & 34) be transferred into the Division of Fraser.

The remaining pocket of Point Cook currently in the Division of Lalor (SA2 Werribee – South 213051368, SA1's 29,30,31,32,33,37,38,40,41 & 44) be transferred into the Division of Gellibrand.

The entire suburb of Williams Landing currently in the Division of Lalor (SA2 Laverton 213051363, SA1's 18,19,20,21,22,23,24,25,26,27,28,29 & 30 & SA2 Truganina – South East 213051587, SA1's 04,05,07,17,19 & 20) be transferred into the Division of Gellibrand.

To ensure that the Divisions remain within the +/- 3.5% of the Projected Enrolment Quota

A section of Truganina currently in the Division of Gellibrand (SA2 Truganina – North 213051586, SA1's 04,05,11,12 & 16) must be transferred into the Division of Lalor. While this is not ideal, other parts of the suburb of Truganina are already in the Division of Lalor and this section shares a greater community of interest with Tarneit and Werribee (within Lalor) than to Point Cook and Williamstown (within Gellibrand).

These changes would leave Actual enrolments as of Wednesday 9 August 2023 and Projected enrolments as of Monday 17 April 2028 of (all within the acceptable ranges):

Division	Actual	Projected
FRASER	118649	129943
GELLIBRAND	112193	122856

LALOR	111604	122910
-------	--------	--------

Below is a rough map to demonstrate the changes that I am proposing.

Thank you for considering my submission.

Regards

Roger Nye
