Regarding proposed boundary changes to the suburb of Flemington from Melbourne to Maribyrnong.

I object to the proposed changes that Flemington be moved to the federal government seat of Maribyrnong. Reasons include:

1. The suburbs of Flemington and Kensington have geographic, historic and demographic connections. The connection has already been ignored due to both local and state boundary changes in the past.
2. If the boundary were to be moved, there would be no guarantee that the interests of the local community would be properly represented. Why try to fix something that is not broken?
3. Flemington is very different demographically compared to the other areas that the seat of Maribyrnong.
