Subject: Multiple voting

Hello

I am writing in relation to Tom Rogers' appearance before Senate Estimates yesterday in which he mentioned that 18,343 people had their name checked off at polling booths more than once in the most recent Federal Election.

Could you please provide a breakdown of which booths and electorates these "multiple votes" occurred. For instance, in booth x there were 10 instances of people being checked off twice, 2 instances of being checked off three times etc.

Thanks
Paul
