To the AEC committee

I would like to support Objection 686 by Kylea Tink MP.

This objection makes a strong, considered case for keeping the electorate of North Sydney. It emphasises the high government-demanded future growth in the electorate, which may not have been appreciated by the committee. It rightly recommends that a low growth electorate should be eliminated. In addition, it recognises the strong sense of community within the electorate of North Sydney. By door knocking and in community engagement I have seen this first hand. The previous election results and the referendum results support the proposition in the most meaningful concrete way.
