NSW FEDERAL REDISTRIBUTION PROPOSAL BY LUKE DIXON

RATIONALE

The following proposal aims to create as even as possible a distribution of voters among the 46 electorates at the 2028 designated timeline. This has been attempted while utilising natural, suburban and road landmarks as definable boundaries.

Using the predicted quota of voters per electorate, a number was allocated to the nearest thousand indicating how many voters were to be redistributed to or from each electorate. For example, +2 would indicate that the electorate was around 2000 voters over allotted, while -2 would indicate an electorate that was around 2000 voters under allotted. This was used as a basis for my calculations.

The proposal suggests the abolition of the North Sydney electorate for multiple reasons, specifically:

- It's low current and future enrolment.
- The close proximity to other under quota electorates.
- That the suburb of North Sydney was unlikely to remain in the electorate if the electorate was to be maintained, causing some confusion in the electorate.
