

Submission S5

Doug Chipman

FINAL SUBMISSION: 2025 COMMONWEALTH REDISTRIBUTION COMMITTEE FOR TASMANIA

Aim

This submission proposes new electoral boundaries for Tasmania that involve a radical restructuring of the three southern electoral divisions. As shown on the map in Annex A, the proposed disposition of electoral divisions is as follows:

- **Bass.** The proposed Division of Bass includes the municipalities of Break O'Day, Dorset, Flinders, George Town, Launceston, and West Tamar in their entirety.
- **Braddon.** The proposed Division of Braddon includes the municipalities of Burnie, Central Coast, Circular Head, Devonport, King Island, Latrobe, Waratah-Wynyard, and West Coast in their entirety.
- **Clark.** The proposed Division of Clark includes the municipalities of Hobart, Kingborough, and Huon in their entirety.
- **Franklin.** This submission proposes the augmented Electoral Commission for Tasmania abolishes Franklin and approves a new electoral division that includes the entire municipalities of Brighton, Clarence, Glamorgan-Spring Bay, Sorell, and Tasman. The Commission should name the new division ***Paredarerme*** (aka Oyster Bay)¹ to honour the original Aboriginal nation that inhabited the area shown on the map of Tasmanian Nations at Annex B.
- **Lyons.** The proposed Division of Lyons includes the municipalities of Central Highlands, Derwent Valley, Glenorchy, Kentish, Meander Valley, Northern Midlands, and Southern Midlands in their entirety.

How the Numbers Stack Up

Based on the data provided by AEC for this redistribution project, Table 1 details the enrolment figures proposed by this submission. It is accepted that the figures may not exactly reflect the final elector numbers for this proposed redistribution due to minor variations between Statistical Area (SA) and Local Government Area (LGA) boundaries in some instances, but they will be extremely close and well within statistical error margins.

	12-Aug-25	deviation		8-Apr-30	deviation
Bass	86193	4.31		86445	2.23
Braddon	84601	2.38		86010	1.72
Clark	80578	-2.49		82615	-2.30
Paredarerme	80223	-2.92		84940	0.45
Lyons	81581	-1.28		82775	-2.11
TOTALS	413176			422785	
<i>quota</i>	82635			84557	

Table 1. Outcome of Proposal

In essence, in addition to meeting the broader guidelines for a redistribution, this proposal meets all the essential criteria by ensuring that the enrolments for the five proposed electoral divisions in Tasmania are well inside the $\pm 10\%$ of a quota as of 12 Aug 2025, and $\pm 3.5\%$ of the projected quota for 8 Apr 2030.

Background and Context

The report of the Redistribution Committee of 2008 acknowledged the 'geographical size of Lyons, and the fragmented boundaries of Franklin' were issues raised in several submissions, but the 2017 redistribution did not address the bifurcated nature of Franklin, divided by the electorate of Clark and the Derwent Harbour. Furthermore, despite attempts to reduce the spread of Lyons by including the Municipality of West Coast in Braddon, Lyons remains a relatively large area geographically, without any major urban centre.

In addition, earlier redistributions have continued the necessary practice of making minor boundary adjustments to meet quota criteria. However, over time these minor adjustments have resulted in various statistical areas switching between divisions with little regard for communities of interest. For example, in the last two redistributions, the historic town of Richmond in the City of Clarence has moved from Lyons to Franklin and back again. Such instability is inimical to good democratic practice and makes it very difficult for communities to build solid democratic relationships.

It is understood that minor boundary adjustments will be a necessary part of redistribution processes in the future, however, the extant distribution of electors in Tasmania offers a unique opportunity to reset the southern Tasmanian electoral division boundaries whilst ensuring that all Tasmanian LGAs are able to be accommodated within one division, in their entirety.

Proposal

This submission proposes further reducing Lyons' geographic area by more than 25% and addressing the bifurcated boundaries of Franklin. It is in this context that this submission recommends that the Commission abolish the electorate of Franklin and that the electoral divisions in southern Tasmania be radically reshaped, including the establishment of a new southeastern Tasmania electoral division. The southeast of Tasmania, as represented by the Brighton, Clarence, Glamorgan-Spring Bay, Sorell and Tasman LGAs, has a population of about 105,000 and occupies about 4400 Km². The number of electors in the area now meets a quota and will continue to do so into the future. The southeast Tasmanian municipalities also form a strong community of interest that transcends LGA boundaries.

SE Tasmania Community of Interest. Apart from keeping close relations with the Brighton Council, in 1993 Clarence, Glamorgan-Spring Bay, Sorell, and Tasman councils agreed to form a wider community of interest, an association known as Southeast Regional Development Association (SERDA) with the following objectives:

- provide leadership through a strategic alliance of the participating councils.
- seek and establish external strategic alliances.
- provide a committed, co-ordinated and co-operative voice for the region.
- develop and manage programs, including but not limited to those related to employment creation, environment, tourism, industry and business development, and natural resource management.
- ensure resources are available to meet its objectives.
- investigate and instigate opportunities for regional cooperation.

There are many shared characteristics between the communities and municipal areas of southeast Tasmania, including coastal community living and enterprises along the peninsulas, inlets, and arcing coastlines of the region. The distinct low rainfall climate and environment of the area foster everyday awareness of water resources and land management issues.

Reinforcing these shared characteristics are the dominant road transport routes provided by the Tasman and Arthur Highways, which connect communities and facilitate travel to regional centres for shopping, medical, and recreational services, in particular to the activity centres at Sorell, Cambridge, and Rosny Park.

The southeast region is also being shaped and strengthened by a range of economic infrastructure drivers, including the:

- Hobart international airport plans for international connections, freight movements and Antarctic related activities;
- Cambridge Industrial Park & retail precinct catering for growth in big box retail and light industrial activities;
- Growth in the Southeast Irrigation Scheme in the Coal River Valley/ Forcett area, unlocking agriculture, viticulture and agritourism potential;
- The Brighton Logistics Hub; and
- Several significant tourism projects/ developments on the east coast, the Tasman Peninsula, in the Coal River Valley, and at Kangaroo Bay, adding to the existing tourism drawcards at Port Arthur, Freycinet, and Richmond.

Franklin. While one option for creating a southeast Tasmanian electoral division would be to retain the name Franklin and radically adjust its boundaries, this is not being proposed. As the 2017 Redistribution Report for Tasmania observed, Franklin is named after colonial lieutenant-governor Sir John Franklin KCH, RN cited in the report as an individual who rendered outstanding service to Australia. However, Franklin's appointment was cut short when the British Government lost confidence in his administration in Van Diemen's Land and he was censured and recalled to England in 1843.² This submission proposes that an Australian electoral division should not be named after a failed colonial administrator.

Paredarmerme. As previously outlined, the newly formed electoral division comprising Brighton, Clarence, Glamorgan Spring Bay, Sorell, and Tasman would geographically encompass the area roughly equivalent to that identified as belonging to the Paredarmerme Aboriginal nation. The Paredarmerme nation was estimated to be the largest Tasmanian Aboriginal nation with 10 clans totalling 700 to 800 people. Given that the guidelines for naming electoral divisions advise

² <https://adb.anu.edu.au/biography/franklin-sir-john-2066> accessed 11 Oct 25.

that 'Aboriginal names should be used where appropriate', the new southeast Tasmanian electorate should be called the Division of Paredarmerme.

Glenorchy and Lyons. This submission includes radical changes with Glenorchy separating electorally from Hobart and joining a rural division with no other major urban areas. Tasmania's other federal divisions already reflect a blend of urban and rural communities, with the City of Launceston (the largest municipality in Tasmania by population) in Bass, Burnie and Devonport in Braddon, and Clarence (the second largest municipality in Tasmania by population) in Franklin. These precedents demonstrate that urban centres coexist meaningfully within broader regional hinterlands, enriching representation and fostering policy responsiveness across diverse populations. Including Glenorchy in Lyons would follow this established pattern, introducing a vibrant urban voice to complement the rural heartlands of the Derwent valley, the midlands and the highlands. Glenorchy's population density, economic diversity, and civic infrastructure would enhance electoral balance, ensuring that Lyons reflects the evolving demographic and geographic realities inherent in the other electoral divisions in Tasmania.

Glenorchy borders, connects to common transport corridors such as the Lyell Highway and the Midlands Highway, and has economic and cultural ties with existing parts of Lyons, such as the Derwent Valley. While its cultural identity is distinct, it is compatible with a broader character of Lyons. Incorporating Glenorchy would promote enrolment parity across divisions and reduce the over-concentration of urban voters in Clark and Franklin. It would also encourage more equitable representation of Tasmania's urban–regional continuum, ensuring that federal policy and advocacy reflect the full spectrum of Tasmanian life, from farming communities and coastal towns to industrial suburbs and civic precincts.

Bass and Braddon. This submission proposes a consolidation of some municipal boundaries for Bass. For example, Bass gains peripheral SAs that sit within the Break O'Day, Dorset, Launceston, and West Tamar LGAs, but loses the Westbury SA2 which joins the rest of the Meander Valley SAs in Lyons. Braddon loses the part of SA1 60402109109 (belonging to the Sheffield – Railton SA2) that is within the Kentish LGA.

Summary of SA2 Moves Between Proposed Electoral Divisions

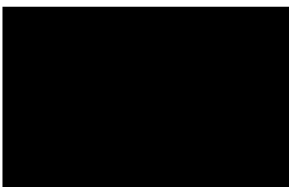

Annex C is a list of statistical area one (SA1) that change divisions in this proposed redistribution. The list is sorted by LGA, and then by SA2 and SA1.

Conclusions

In conclusion, this proposal for Tasmania's federal electoral boundaries seeks to establish a more equitable, coherent, and representative framework for the entire state. By abolishing the Division of Franklin and creating a new Division of Paredarerme, the proposal provides an opportunity to better balance representation around communities of interest defined by LGA, and better reflect Tasmania's changing population distribution and regional identities.

A key feature of this submission is that **every Tasmanian local government area (LGA) would be located wholly within a single electoral division**. This approach eliminates the fragmentation that currently occurs when LGAs are divided between electorates, thereby strengthening local representation and collaboration. It ensures that each municipal area can speak with a unified voice on issues of community importance, fostering clearer accountability and more effective engagement between local governments and their federal representatives. This more streamlined and geographically coherent structure will promote fairer representation, encourage civic participation, and enhance the capacity of Members of Parliament to address local and statewide priorities with greater consistency and understanding. In light of ongoing demographic change, the proposed boundaries offer a resilient and sustainable framework for democratic representation that can serve Tasmania well into the future.

Ultimately, these reforms will contribute to a stronger and more inclusive democracy in Tasmania, one that recognises community identities, reinforces collaboration among municipalities, and ensures that every Tasmanian voice is clearly and fairly represented in the federal parliament.

Doug Chipman
Former Mayor, City of Clarence
