

Submission S3

PJ

Dear Commissioner,

Thank you for the opportunity to make this submission into the ACT electoral boundaries.

My proposals are brief, please see below.

1. Fenner

Fenner's starting projected elector figure is 111,742, so approximately 3,000 votes below the required projected 114,842 electors for quota.

I expect I won't be the only person to suggest the SA2 of 'Hawker' be transferred from Canberra to Fenner, with its 2,204 electors, to bridge this gap.

Projected electors: $111,742 + 2,204 = 113,946$

2. Canberra

Canberra starts on 109,175 projected voters, loses 2,204 in Hawker to Fenner, and therefore requires close to 8,000 electors from Bean to reach quota. I'd suggest simply transferring the 6,079 projected electors in the 'Phillip' SA2 from Bean to Canberra.

Projected electors: $109,175 - 2,204 + 6,079 = 113,050$

3. Bean

Bean starts with 123,608 projected voters. Losing 6,079 projected electors in the 'Phillip' SA2 to Canberra cuts it to 117,529, sufficiently close to quota.

Projected electors: $123,608 - 6,079 = 117,529$
